Group Members: Krina Patel, Yash Patel, Shreyas Joshi and Huy Ngo

GitHub link: https://github.com/soulden1202/group-3-capstone-project.git

Time and place of the meeting:

- 8:00 AM, the meeting was conducted on Zoom on Friday Feb 3rd, 2023.

Who was present?

- Professor Michael Meluksy, Yash Patel, Krina Patel, Shreyas Joshi and Huy Ngo

What have you discussed with the faculty Advisor? '

- During the meeting we discussed our progress on the project and how far we got. When we were done showing him the progress, we discussed about two features we are planning on to implement, first one is search bar and second one is house owner side where he/she can upload the information about house on our web application. We also asked him how we should implement search bar he recommended do it react which we are already using it for our project then he told us try implementing auto fill feature for your search bar by adding the api from the firebase database.

What are his/her suggestions or comments?

- He recommended try looking into .Net for web application if we add more pages to our web application then he ended up saying since we have only 4-5 pages sticking to React.js would be good idea.
